Our story

In Uzbek legend, Humo is the bird of happiness. Whoever its shadow falls on is blessed with good fortune.

Humo AI puts that bird beside every student preparing for the Digital SAT. Humo is a patient, clever tutor that explains, encourages and celebrates, and helps students from Tashkent and beyond reach the university they dream of.

The logo shows Humo with its wings raised, rising, and crowned with a four-point spark: the mark of intelligence that sets Humo AI apart.

Personality

Wise
Knows the SAT inside out, explains it simply.

Warm
Encouraging, never judging. Mistakes are part of learning.

Ambitious
Aims high: top scores, top universities.

Clear
Short sentences, real steps, no fluff.

Voice

✓ **Say** "Nice! That's 3 in a row. Ready for a harder one?"

✕ **Not** "Congratulations on successfully completing the assessment item."

02

The logo

The Humo

The bird of happiness with raised wings: four feathers on each side, five tail plumes, head turned to the right, looking forward.

The AI spark

A four-point star crowning the bird. It stands for intelligence and is the brand's main graphic element.

The wordmark

"Humo AI" set in Onest Bold, tracking -2.5%. "Humo" in gold, "AI" in white on dark; "Humo" in navy and "AI" in Gold Deep on light.

03

Logo variations

Horizontal (primary)
Website header, documents, wide spaces.

Stacked
Square and tall spaces, posters, merch.

Mark
When the name is already nearby, or very small sizes.

App icon
Phone home screen, favicon, browser tabs.

Seal
Round avatars: Instagram, Telegram, YouTube.

Wordmark
Only where the bird already appears, e.g. next to the 3D Humo.

04

Colour versions

Full colour on dark
The preferred version. Gold "Humo", white "AI".

Full colour on light
Navy "Humo" so it stays readable on white.

Navy
On gold, cream or for one-colour print.

White
On photos (with a dark overlay) or coloured backgrounds.

Flat gold
Foil, embroidery and engraving, where gradients can't print.

Black
Fax, stamps, newspaper. Only when no colour is possible.

05

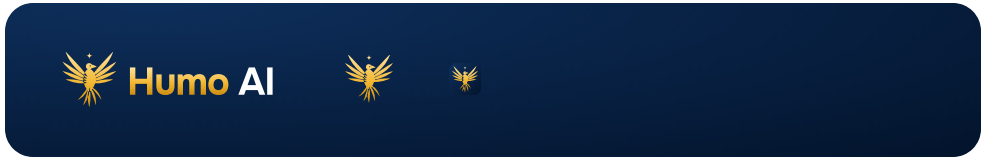

Clear space & minimum size

Clear space. Keep an empty margin of **X** on every side, where X is one quarter of the mark's height (about the height of the bird's head). The logo files already include this space.

Minimum sizes

	Screen	Print
Horizontal logo	120 px wide	30 mm wide
Stacked logo	72 px wide	20 mm wide
Mark	24 px tall	8 mm tall
Seal / avatar	40 px	12 mm
Favicon	16 px (use favicon.svg)	–

Below these sizes the feathers start to merge. Use the favicon version (a slightly larger bird inside the tile) for anything under 32 px.

06

Logo misuse

✕ Don't stretch or squash

✕ Don't rotate

✕ Don't recolour

✕ Don't add shadows or glows

✕ Don't outline

✕ Don't lower the opacity

✕ Don't put gold or white text on white

✕ Don't place on busy backgrounds

Proportion

Navy carries the brand. Gold is precious: use it for Humo, key numbers and the one action that matters on a screen. Crimson is a spice, never a main colour.
